

# Signature upload guidelines

During the registration process you are required to upload a digital photograph of your signature and these guidelines are intended to assist you in this process.

## Step 1

Print a copy of this PDF and then sign your name in either black or dark blue ink within the white panel below in order to fill the panel as per the example.

## Step 2

Photograph your signature so that the grey border is just outside the edge of the photo and your entire signature is visible within the photo. A photo from a smartphone is OK. Please ensure there is enough light to clearly display your signature in the final photo.

## Step 3

Upload the photo of your signature when registering online.
